PROFESSIONAL SUMMARY

PHP/Laravel Full Stack Developer with 3+ years of experience building, maintaining, and scaling robust web applications using PHP, Laravel, Symfony, and MySQL. Skilled in designing RESTful APIs, implementing role-based access control (RBAC), and optimizing complex database queries. Proven expertise in integrating key third-party platforms such as Stripe, Twilio, Asterisk, and OpenAI APIs to drive business automation and communication workflows. Strong collaborator in Agile environments adept at cross-functional teamwork, root-cause debugging, and production troubleshooting.

TECHNICAL SKILLS

Backend: PHP 8.x, PHP 7.4, Laravel, Symfony, MVC, Object-Oriented Programming (OOP)

APIs & Integration: REST APIs, RESTful Web Services, JSON, AJAX, Postman, Swagger/OpenAPI, Third-Party API Integration

Database: MySQL, Relational Database Design, Schema Design, Indexing, Query Optimization, SQL

Authentication & Security: Authentication, Authorization, Role-Based Access Control (RBAC), Secure API Handling

Frontend: HTML5, CSS3, JavaScript, Bootstrap

Platforms & Integrations: Stripe, Twilio, Asterisk, WordPress, OpenAI APIs

Development & Tools: Git, GitHub, Linux/Unix, Apache, Docker (Basic), CI/CD (Basic)

Others: Python (Basic), API Testing, Debugging, Root-Cause Analysis, Performance Tuning

PROFESSIONAL EXPERIENCE

Software Developer | Zibtek Pvt. Ltd., Bangalore | July 2023 – Present

- Develop and maintain backend web applications using PHP, Laravel, Symfony, and MySQL.
- Design and implement RESTful APIs for frontend applications and third-party integrations, enabling secure data exchange across application workflows.
- Develop modular backend functionality using MVC architecture and object-oriented programming principles.
- Implement authentication, authorization, role-based access control (RBAC), and secure API handling.
- Integrate third-party services including Stripe, Twilio, Asterisk, and OpenAI APIs to support application and communication workflows.
- Design and optimize MySQL queries, database schemas, and indexing to improve application and API performance.
- Investigate and resolve application, API, database, and server-side issues through debugging and root-cause analysis.
- Test and document APIs using Postman and Swagger/OpenAPI and manage source code using Git and GitHub.
- Support application deployment and production troubleshooting in Linux-based environments.
- Collaborate with frontend developers, QA engineers, and product teams in Agile development workflows.

PROJECTS

Document Workflow Management System

- Developed Laravel backend modules for document approval workflows, status transitions, user roles, and permissions.
- Designed and implemented REST APIs for document tracking, workflow operations, status updates, and role management.
- Optimized database queries and request handling to improve application processing efficiency.

Service Marketplace Platform

- Developed Laravel and MySQL backend modules for user management, service listings, transactions, and authentication.
- Implemented REST APIs for frontend-backend communication and role-based access control.
- Optimized database queries and supported secure data handling across application workflows.

VoIP Communication System

- Developed backend integrations for VoIP services using Asterisk and Twilio.
- Supported call-handling workflows, debugging, maintenance, and integration-related issues.

WordPress Projects

- Customized WordPress themes, integrated plugins, and implemented backend modifications for CMS-driven websites.
- Supported website maintenance and performance improvements.

AI Chatbot Backend System — Personal Project

- Developed a Python-based chatbot backend using REST APIs and OpenAI API integration.
- Implemented request-response handling and database-backed response management.

EDUCATION

Master of Business Administration (MBA) — Business Analytics | AVS Engineering College, Salem

Bachelor of Engineering (B.E.) — Mechanical Engineering | Shreenivasa Engineering College, Dharmapuri
